

# Ali Al Hadi Elchab

Flutter Mobile Engineer  
Canadian Citizen | Based in Lebanon | Available for Remote / EST Overlap  
[✉ alielchab01@gmail.com](mailto:alielchab01@gmail.com) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Flutter Mobile App Engineer with 3+ years of experience shipping production mobile apps across ecommerce, warehouse management, CRM, ERP, POS, delivery, and e-book platforms. Strong in clean architecture, Cubit/Bloc state management, API integration, Firebase, CI/CD, data modeling, caching, and App Store / Play Store release workflows. Experienced owning mobile features end to end, from UI implementation and API integration to testing, deployment, production fixes, and release support.

## Skills

**Mobile (Flutter):** Mobile (Flutter): Flutter, Dart, Cubit/Bloc, GoRouter, Clean Architecture, Firebase Auth/Storage/FCM, Hive, SQLite, REST APIs, Responsive UI, App Store / Play Store Releases  
**Backend:** Laravel, MySQL, REST API Design, JWT/OAuth, Multi-role Auth, Database Design  
**Tools:** Tools: Git, GitHub, Postman, Docker, Linux, Firebase Console, CI/CD, App Store Connect, Google Play Console  
**Languages:** Dart, PHP, JavaScript, Java, C#

## Professional Experience

### Flutter Developer / Mobile Engineer - Brain Solutions – Beirut · Apr 2024 – Present

- Shipped 7+ production Flutter apps across ecommerce, warehouse management, CRM, e-book, delivery, POS-related, and business operations platforms.
- Managed production release workflows for iOS and Android, including App Store Connect, Google Play Console, build configuration, publishing support, production fixes, dependency upgrades, and release stability.
- Owned mobile features end to end, from responsive UI implementation and Cubit/Bloc state management to API integration, data modeling, testing, production fixes, and release support.
- Architected a warehouse management system with barcode scanning, live inventory syncing, stock transfers, and role-based access across 5 user types.
- Built CRM features including lead tracking, client portal, activity logging, service management, and multi-role access using Flutter and Laravel APIs.
- Designed a reusable Flutter starter skeleton with clean architecture, Cubit, GoRouter, API handling, caching, theming, localization, and environment config — reducing new project setup time by 60%.
- Supported codebase cleanup, dependency upgrades, Git branching structure, production stability, and coordination between frontend and backend developers.
- Integrated device-related workflows including barcode scanning, inventory syncing, POS-related operations, mobile permissions, and production troubleshooting across Android and iOS.
- Supported CI/CD and build automation workflows for mobile releases, including environment configuration, dependency management, and release preparation.

### IT Technician - Cosmaroma Inc – Toronto · May 2022 – Aug 2023

- Managed IT operations for a multi-branch retail company, including Azure AD, Office 365, POS systems, endpoints, printers, networking, and user support.
- Supported retail infrastructure including POS terminals, barcode scanners, receipt printers, workstations, and branch-level troubleshooting.

### IT Helpdesk - Vast – Beirut · Aug 2020 – Apr 2022

- Supported 200+ employees across 100+ Windows/Linux systems, led OS upgrades, and managed network and device lifecycle
- Assisted with hardware lifecycle, user support, system setup, and technical issue resolution.

## Projects

### Civissol — Warehouse Management System · Flutter · Laravel · MySQL

Inventory control platform for a business in Africa. Multi-warehouse flows, barcode scanning, inventory syncing, offline-aware operational flows, and role-based access across 5 user types.

### FreshZone — eCommerce App · Flutter · Laravel · Firebase

Supermarket mobile app with responsive product browsing, search, cart, promo handling, API-driven checkout flow, and production release support.

### Excellence Quality — CRM Platform · Flutter · Laravel · Firebase

Lead management and CRM platform with client portal, activity tracking, service management, and multi-role access.

### Dar Alrafidain — E-book Platform Flutter · Firebase

Arabic e-book platform live on App Store and Play Store. Features in-app purchases, online payments, offline reading, and encrypted downloads.

### Flutter Starter Skeleton · Flutter · Cubit · GoRouter · Clean Architecture

Reusable Flutter architecture with auth, API handling, caching, Cubit base, reusable UI components, theming, localization, environment configuration, and scalable feature structure. Cut new project setup time by ~60%.

## Training and Certifications

### SE Factory Full-Stack Bootcamp, 2024 – Laravel, JS, Git, APIs; final project in Flutter

### Flutter & Dart – Complete Guide (Udemy) 2024

### CS Foundations – SE Factory 2023 – Python, data structures, algorithms

## Education

### Bachelor in Computer Engineering

Lebanese International University - Lebanon  
October 2018 - July 2021

## Languages

English (Fluent), Arabic (Native)
